

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

AMERICAN JOURNAL OF BOTANY

DEVOTED TO ALL BRANCHES OF BOTANICAL SCIENCE

ESTABLISHED 1914

EDITED BY A COMMITTEE OF THE
BOTANICAL SOCIETY OF AMERICA

EDITORIAL COMMITTEE

C. E. ALLEN, Editor-in-Chief,
University of Wisconsin

WILLIAM CROCKER,
*The Thompson Institute
For Plant Research, Inc.*

H. H. BARTLETT,
University of Michigan

C. STUART GAGER, Business Manager
Brooklyn Botanic Garden

ARTHUR H. GRAVES,
Brooklyn Botanic Garden

R. A. HARPER,
Columbia University

I. F. LEWIS,
University of Virginia

C. L. SHEAR, *Bureau of Plant Industry*
(Representing American Phytopathological Society)

The *Journal* is published monthly, except during August and September. Subscription price, \$6.00 a year. Postage to Canada, 20 cents; to other foreign countries (except Mexico and Cuba) 40 cents a volume on annual subscriptions. Single copies 75 cents. Back numbers, 75 cents each; \$7.00 a volume, post free.

The pages of the *Journal* are open to members of the Botanical Society of America, or to candidates approved for membership.

Manuscript offered for publication should be typewritten, and should in all cases be submitted to the Editor-in-Chief.

Papers are limited to 20 pages in length, exclusive of plates, except that additional pages may be arranged for at cost rate to authors (approximately \$4.00 a page).

Proofs should be corrected immediately on receipt, and returned to American Journal of Botany, Brooklyn Botanic Garden, Brooklyn, N. Y.

Illustrations, other than zinc etchings, and tabular matter should, in general, be restricted to approximately ten percent of the number of pages of text. Authors may be charged at cost rates for illustrations and tabular matter in excess of that amount (approximately \$6.40 a page for tabular matter; 15 cents per square inch for half-tones).

Separates should be ordered when proof is returned. Fifty copies without cover will be supplied free; cover and additional copies at cost.

Remittances should be made payable to American Journal of Botany. Ten cents must be added to all checks not drawn on New York City banks.

Claims for missing numbers should be made within 30 days following their date of mailing. The publishers will supply missing numbers free only when they have been lost in the mails.

Correspondence concerning editorial matters should be addressed to Prof. C. E. Allen, University of Wisconsin, Madison, Wisconsin.

Business correspondence, including notice of change of address, and directions concerning reprints, should be addressed to American Journal of Botany, Brooklyn Botanic Garden, Brooklyn, N. Y., or The New Era Printing Co., Inc., Lancaster, Pa.

50 E. Ohio St.,

Leitz Universal Photo-Micrographic Apparatus Ia

In order to obtain satisfactory results in Photo-Micrography, apparatus used for this purpose have to be constructed in such a way as to avoid vibration.

The Leitz Apparatus Ia meets these requirements in an ideal manner; the entire instrument rests upon a bed of steel tubes, which remain in place even when inclining the camera to a vertical position.

Its construction is not unnecessarily voluminous; it is built in a manner consistent in combining rigidity with compact size.

Many laboratories have declared this apparatus to be highly efficient and the work it has permitted speaks of itself.

Note: We likewise offer Photo-Micrographic Apparatus of smaller and less expensive design.

Catalog G (z) describes the various models. If interested, please write for same.

Complete stock of Laboratory Apparatus, Glassware, etc., always on hand for prompt delivery. Equipping complete laboratories is our specialty; our import service is reliable and through our connection, one of Economy. Estimates are rendered promptly.

SPENCER Convertible Binocular Microscope, No. 58

In addition to regular microscopic work, this instrument is **convertible** :

For examining large objects on a table.

For examining vertical surfaces.

For examining high objects.

Advantageous Features

- I. Inclination joint.
- II. Removable stage.
- III. Long range of upward and downward movement.
- IV. Adjustable arm covering entire stage.
- V. Mirror adjustable in all directions.
- VI. Accommodation for pupillary distance.
- VII. Automatic shutter cutting off light to either eye.
- VIII. Patented solid objective mount, holding lenses in absolute alignment.

ADAPTABILITY, USABILITY AND EFFICIENCY AT ITS BEST

ANCO BIOLOGICAL SUPPLIES

Preserved Material for Botany

Our stock on hand consists of most of the commoner types studied in the average plant morphology class. The material is put up in unit quantities, each unit sufficient for a class of ten students. The cost is \$1.00 per unit, three units for \$2.00.

Botanical Slides

Our botanical slide set BA is intended to accompany courses in plant morphology. Suggested by two botanists of undoubted ability, and executed by really first class technicians, this set is far ahead of similar grouping sold by any other commercial firm in the United States.

The set complete sells for \$18.00 and comprises thirty slides which cover the morphology of plants in a fairly comprehensive manner. The following slides, for example, are drawn from that portion of the set which deals with the Filicales. Other classes are represented in just as typical a manner.

BA 21. Fern Prothallia with sex organs. Whole Mount.

BA 22. Fern ; transverse section of leaf, showing sporangia.

BA 23. Transverse sections of stems of Gleichenia (protostele), Adiantum (amphiphloic siphonstele), Pteris (polystele) and Osmunda (ectophloic siphonstele), all mounted on one slide to show the four steles.

Send for Descriptive Price List No. 21 covering these and other slides.

Bausch & Lomb Binocular Microscope

F S E

Binocular Microscope, FSE
Price, \$175.00

A new simplified model of parallel tube type binocular microscope, for single objectives, offered at a price much lower than has previously been possible.

It has all the adjustment usually found in a laboratory microscope—side fine adjustment of lever type, coarse adjustment by diagonal rack and pinion, sub-stage with Abbe condenser focused by a quick-acting screw, and pillar provided with inclination joint.

Eyepiece tubes are adjustable for interpupillary distance by means of a compound slide. One tube has spiral adjustment for focusing to correct any difference in vision existing between the two eyes.

Tube length is fixed at 160 mm, always giving the right distance between eyepieces and objectives.

In use, the FSE eliminates eyestrain, causes more detail to appear, and provides binocular vision.

PRICE, FSE 8, Abbe condenser, 1.20 circular nosepiece, paired eyepieces, 5X and 10X and objectives 16 mm, 4 mm and 1.9 mm 1.25 oil. \$175.00.
